

Aykhan Nuri

AI/ML Engineer | Machine Learning, Applied AI and Python Backend

Baku, Azerbaijan | +994 50 821 00 54 | aykhannuri02@gmail.com

PROFESSIONAL SUMMARY

AI/ML Engineer with a B.S. in Computer Science and hands-on experience across the machine-learning lifecycle, from data preparation, feature engineering, model training, and evaluation to API integration and deployment. Builds machine-learning solutions, intelligent automation, RAG applications, and multi-agent systems using Python, scikit-learn, FastAPI, and modern AI frameworks. Prior experience includes enterprise healthcare software at Cerner and NSF-sponsored research involving model training and knowledge graph construction.

TECHNICAL SKILLS

Programming: Python, SQL, TypeScript, JavaScript

Machine Learning: supervised and unsupervised learning, classification, regression, clustering, data preprocessing, feature engineering, model training, cross-validation, hyperparameter tuning, model evaluation

Applied AI: RAG, agentic systems, function/tool calling, embeddings, semantic search, prompt engineering, query rewriting, reranking, LLM evaluation

Frameworks and Data: scikit-learn, FastAPI, LangGraph, LangChain, OpenAI API, Pandas, NumPy, PostgreSQL, SQL Server, Redis, Qdrant

MLOps and Engineering: model serving, REST APIs, asynchronous Python, Docker, Linux, GitHub Actions, CI/CD, caching, logging, monitoring

PROFESSIONAL EXPERIENCE

AI Engineer

Sep 2025 - Present

Veyseloglu LLC | Baku, Azerbaijan

- Design and develop AI/ML systems for business-process automation, information retrieval, and decision support across internal workflows.
- Build Python data pipelines and FastAPI services for model integration, inference, evaluation, and connectivity with enterprise APIs and databases.
- Develop RAG and multi-agent workflows using embeddings, Qdrant, semantic search, query rewriting, reranking, tool calling, structured outputs, and fallback logic.
- Strengthen reliability with caching, logging, monitoring, retries, rate-limit handling, error management, and Docker-based deployment.

AI Developer Intern

Jun 2024 - Jul 2024

Araz Supermarkets Chain | Baku, Azerbaijan

- Developed an AI-powered customer service chatbot that combined dataset-based question answering with GPT fallback for uncovered queries.
- Applied vector embeddings and semantic search to improve retrieval quality and automated knowledge-base updates to keep source data current.

Backend Developer

May 2023 - May 2024

Cerner Corporation | Kansas City, Missouri, USA

- Designed and optimized scalable backend services supporting enterprise healthcare applications and EHR data integrations.
- Improved system performance, reliability, and efficiency in a high-traffic enterprise environment through backend and data-processing enhancements.

Research Assistant

Jan 2022 - Apr 2023

UMKC School of Science and Engineering | Kansas City, Missouri, USA

- Developed Python pipelines to extract, clean, transform, and prepare research datasets for an AI-focused project sponsored by the National Science Foundation (NSF).
- Trained and evaluated machine-learning models using feature engineering, model selection, validation, and iterative experimentation.
- Built knowledge graphs from processed data to represent entities and relationships for downstream research and model-development workflows.

EDUCATION

B.S. in Computer Science

2019 - 2024

University of Missouri - Kansas City | Kansas City, Missouri, USA
